

Date of study

October 2020–February 2021

Date of Public Archiving:

June 2023

Last modified:

4 December 2024

Goal

Use climate variation to manipulate the relative germination phenology of competing herbaceous species to assess the role of phenological priority effects in within season competition

Contributors

Dan Buonaiuto dbuonaiuto@umass.edu or danielbuonaiuto@gmail.com

Lizzie Wolkovich

Data and Code

Give info on how to track down all locations given in table below (even if link fails). Two good examples given below -- delete these for your file!

Github <https://github.com/dbuona/seedpriorities> (competition trials)
https://github.com/dbuona/timetogermenate/tree/master/germination_trials (germination trials)

File	Where	What
Archived data files	https://knb.ecoinformatics.org/view/doi:10.5063/F1ZG6QPW	Germination and competition data

Possible extras:

Any amendments to when public archiving happen should mentioned here and an asterisk given above where archiving date is given.

Be sure all your data is somewhere where it is backed up as per the data management plan.

Check this file for accuracy, and update as needed, every 6 months or sooner.
