

Date of study

November 2018 - May 2021

Date of Public Archiving:

June 2021

Last modified:

8 December 2023

Goal

To assess the effects late spring freezes and reduced over-winter chilling on sapling phenology, growth and tissue traits, across eight temperate tree and shrub species in a lab experiment.

File	Where	What
Chamberlain & Wolkovich (2021)	Late spring freezes coupled with warming winters alter temperate tree phenology and growth Catherine J. Chamberlain, E. M. Wolkovich First published: 01 May 2021 https://doi.org/10.1111/nph.17416	Publication

Data and Code

Give info on how to track down all locations given in table below (even if link fails). Two good examples given below -- delete these for your file!

Github <https://github.com/cchambe12/chillfreeze>

File	Where	What
Archived data	https://knb.ecoinformatics.org/view/doi:10.5063/F47MJ4	Growth chamber and greenhouse data

Possible extras:

Any amendments to when public archiving happen should mentioned here and an asterisk given above where archiving date is given.

Be sure all your data is somewhere where it is backed up as per the data management plan.

Check this file for accuracy, and update as needed, every 6 months or sooner.
