

WildChrokie WDC

****This is the WDC for the common garden project on tree cookies which will be included in Christophe's Chapter 2 ****

Last Modified: 31 March 2024

Date of Study

2015 to spring 2023. Followed work on the cookies started in September 2024 and should be completed in December 2025.

Date of Public Archiving:

January 2026 (estimated)

Goal

Understand how phenology relates to growth for juvenile trees.

Contributors

Ongoing:

Christophe Rouleau-Desrochers

e.wolkovich@ubc.ca

Neil Pederson

Experiment setup/Maintenance/Harvest:

Dan Buonaiuto

Catherine Chamberlain

General Files

File	Where	What
guidelinescookies.md	Github	Notes on how to use the tool Adam created to add guidelines to cookies. Python code can be found here
notesCookieScaping.md	Github	All the notes taken while measuring tree rings. This includes measurements rounds, the cookies for which I was confident and the ones I am not.
wherethingsare.md	Github	Temporary file to try to make sense of where the information is located. I need to work better on that and the end goal is to gather all the information together.

Data

File	Where	What
Seedlings to Raised Beds 2016.edit.xlsx	Github	Seedlings from raised beds. This is data copied from the main repo

Cleaned files	Where	What
---------------	-------	------

Code

Code	Where	What
solvingPuzzle.R	Github	Temporary R code to look at the data from 2016 to try to understand the year each seedling was planted

Possible Extras:

- Any amendments to public archiving should be mentioned here and an asterisk added above where the archiving date is given.

- Ensure all data is backed up as per the data management plan.
- Check this file for accuracy and update as needed every 6 months or sooner.
