

Daily Log: Summer 2024

May 15, 2024

24 April 2024

Started Smither's field work prep:

- Researched tagging adult trees and started git issue of where to buy tags and what type of nails to use:
<https://github.com/lizzieinvancouver/bc/issues/2>
- Looked into booking campsite
 - Riverside municipal—6 people max, two tents—\$26
 - Tyhee Provincial parks—4 people max, three tents—\$27+7(fees)
 - Dates: July 15-23

Worked from home. Attended the Bayes for Conservation meeting and worked on revisions to the Traitors manuscript. Sent a follow-up email to Nacho to check in on the conceptual figure.

25 April 2024

Campus day. Pouring rain! Helped with Christophe's observations with Justin and Mao. Rotated pots between growth chambers, except for the pots from the big chamber that we just moved on Monday.

One of the middle chambers smells bad! There is also water leaking out of the bottom vs out of the drainage pipe. I think this is because people keep tripping over the pipe and kicking it! Will try duct taping it next week and figure out how to lift the floor to see if the drain is clogged before putting in a work order.

The irrigation system has been installed in greenhouse so Mao and I wiggled some of the pots around so they would all be watered for the next few days. Also noticed some bepa are falling over in the greenhouse

(too tall for the small pots they are in) and there are roots coming out of some of the ones in the growth chamber—will tell Christophe so he can prioritize repotting them!

Also applied for a Ministry of Forestry job.

26 April 2024

Worked from home. Spent the morning doing miscellaneous admin tasks:

1. Replied to git issues and sent emails regarding Christophe's project.
2. Set up meeting for Monday to discuss conceptual figures for trait papers with Nacho.
3. Called Kon Auto—taking car in Wednesday

Afternoon spent doing edits for the NEE revisions of our Synchrony MS.

29 April 2024

Campus day. Met with Nacho to discuss trait conceptual figures. Met Ken, Selena, and Justin in the lab at 1pm. Cleaned the lab with help from Selena and later Justin. Worked on NEE edits to Synchrony MS.

30 April 2024

Worked from home. Finished edits to Synchrony MS and emailed Lizzie. Canceled Kon auto—car wouldn't start and no one around to help me boost it, also feeling a little overwhelmed and decided to prioritize getting Synchrony done!

1 May 2024

Worked from home. Emailed Google sheet for lab equipment inventory to Selena, coordinating with Christophe, and updating git issues for fuelinex and egret. Worked on traitors writing.

2 May 2024

Campus day, so beautiful and sunny! Met with Christophe and helped him get set up. Helped him with observations in the growth chamber and talked a bit about the irrigation system. Continued working on the traitors edits.

3 May 2024

Worked from home. Had personal matters and decided to take a personal day. Will work over the weekend instead.

4-5 May 2024

Incorporated Lizzie's comments on my Synchrony MS and sent it back to Lizzie.

6 May 2024

Morning spent incorporating minor edits from Lizzie regarding Synchrony MS and sending emails. Went to campus and met with Christophe. We discussed his experiment and options for putting the tapes on the trees. Sent him and Mao info on lab data management. Applied for job in Northwest Territories and prepared for interview with Team Shrub.

7 May 2024

Worked from home. Booked the Smithers campground for July. Worked on traitors ms edits. Spent some time working on the conservation4bayes Stan modeling. Prepped for Team Shrub interview—including 1 page statement for collaboration and 1 page research proposal.

8 May 2024

Worked from home. Had a postdoc interview, which I hope went well. Submitted Synchrony revisions. Sent emails and did various logistics administria.

9 May 2024

Worked a half day before taking off for a vacation! Replied to emails, worked on Cons4bayes Stan modeling and a little bit of traitors writing.

14 May 2024

Back from vacation, but had a personal medical thing pop up. Received an invitation to interview Wednesday for the Hakai postdoc while on vacation, which I scrambled to prep for.

15 May 2024

Interviewed for the Hakai postdoc, which sounds like a cool opportunity! Replied to emails regarding ISP

and worked on preparing better documentation for future. Working my way through emails from the past few days. Afternoon spent working on the traitors MS.
